*Emergency Repair*

### ➤ Crane and Dragline Parts

FEMCO sources and manufactures critical replacement parts for American, Lima, B-E, Marion, Link Belt, and Liebherr machines. FEMCO reverse engineers obsolete, expensive, and long-lead-time parts.

### ➤ Quality Used Parts

FEMCO supplies quality used assemblies and parts for your crane or dragline. Track pads, hoist assemblies, lagging, engines, and other parts are sourced to meet your needs.

*FEMCO has extensive experience in the repair of many makes and models of cranes and draglines.*

### ➤ Undercarriage Parts

FEMCO also offers new aftermarket undercarriage parts for American, Lima 2400, and B-E 88B units. New undercarriage parts, idlers, tumblers, and track pads are made by leading foundries; then machined and inspected by FEMCO to insure their quality.

### ➤ Torque Converter Exchange Program

FEMCO works with qualified repair facilities to provide repaired and tested torque converters for Lima and Manitowoc equipment. Experienced FEMCO field service technicians provide troubleshooting and expert installation.

### ➤ Rebuild and Replacement

FEMCO re-machines and repairs components to exact OEM standards, including: jackshafts, tumblers, drag, and hoist assemblies.

### ➤ Ring Gear & Roller Path Services

FEMCO builds new ring gears, roller paths, or repairs existing units. House and hook roller wear areas are welded and machined back to OEM standards. Worn and broken teeth are welded and cut back to industry standards. Car bodies with an integrated circle can be fully repaired.

### ➤ Gear Re-Rimming & Sprocket Repair

FEMCO re-rims worn bull gears and drive gears with new teeth and splines. Also, FEMCO repairs worn drive sprockets and other vital components.

### ➤ Field Services & Support

FEMCO provides dependable mobile field service & support along with emergency repair service - 24/7.
